

CONTENTS

SIXTH INTERNATIONAL SYMPOSIUM «INSTITUTO “REINA SOFIA” DE INVESTIGACIÓN NEFROLOGICA»

A Coruña, November 18-19th, 1999

Guest editors

Santiago Lamas, Alfonso Otero, Francisco Valdés and Francisco Ortega

I. INTRODUCTION

F. Ortega, J. Baltar, M. Rodríguez, P. Rebollo and L. Hernando

II. GENE THERAPY

Gene therapy in the vasculature and the kidney

B. J. Ballermann

III. CELLULAR BIOLOGY OF CALCINEURIN INHIBITORS IMMUNOSUPPRESSORS

A) The NFAT family of transcription factors as targets for the immunosuppression

I. Ortega-Pérez and J. M. Redondo

B) Cyclosporine A produces intracellular superoxide anion in the endothelium

J. Navarro-Antolín and S. Lamas

IV. ADVANCES IN CONTINUOUS AMBULATORY PERITONEAL DIALYSIS

A) Role and regulation of apoptosis in peritoneal cell number

M. P. Catalán, C. Lorz, A. Reyero and A. Ortiz

B) Early ultrafiltration failure in peritoneal dialysis patients

R. Selgas, M. A. Bajo, A. Cirugeda, M. J. Castro, G. del Peso, A. Aguilera, A. Fernández-Perpén and J. A. Sánchez-Tomero

C) Automated peritoneal dialysis

A. Rodríguez-Carmona

D) Impact of peritoneal transport on clinical outcome

J. Teixidó
